

L'esame della certificazione linguistica TORFL presso il centro della certificazione RISFONLINE viene svolto ONLINE con l'uso del web browser SEB (Save Exam Browser).

Dopo aver effettuato accesso ad ogni test delle prove dell'esame il candidato vedrà questa immagine

Prima di tutto è necessario scaricare il SEB considerando il proprio sistema operativo

Una volta premuto il pulsante “Scarica Safe Exam Browser” si apre la pagina ufficiale del SEB dove sarà necessario scegliere la versione adatta al proprio sistema operativo:

Safe Exam Browser 3.0 for Windows

Safe Exam Browser 3.0.1 for Windows 8.1 and 10
SHA1: 8d7e987bd4997b0350a7afcba4b51c3dcfed52b9

[Download from GitHub project site.](#)

The next major version of Safe Exam Browser for Windows. SEB 3.x for Windows has been completely refactored and uses Chromium as integrated browser engine. However, SEB 3.0.0 does not yet provide the complete feature set of SEB 2.x (e.g. no Additional Resources). Below a list of the most prominent new features and changes:

- New, embedded browser engine (Chromium Version 81.0.4044.138).

macOS

Safe Exam Browser 2.2.1 for macOS

Current version of Safe Exam Browser for macOS 10.15, 10.14, 10.13, 10.12, 10.11 (limited support for 10.10, 10.9, 10.8* and 10.7*)
Build 2E48. SHA1: 6ea7500893d77d2ceb1329557108872f02b0701c

[Download from GitHub project site.](#)

SEB 2.2.1 for macOS is a major update, improving security by blocking prohibited processes, adding new capabilities and offering full compatibility to enhanced integrations with learning management systems, like the one available in Moodle 3.9.

- Prohibited Processes settings for blocking specific processes and applications from running together with SEB.
- Preset prohibited processes covering communication, screen sharing and recording apps. Let us know if you would like to suggest applications and tools to be added to those preset prohibited processes (we need information about the software and its name and Bundle Identifier (if applicable)).
- Added settings to allow to reconfigure SEB, even it is already running in a secure exam session.
- Implemented setting keys to control clearing cookies when starting/ending an exam session (examSessionClearCookiesOnStart / examSessionClearCookiesOnEnd). This can be used to keep users logged in from the previous session after an exam session was started (and SEB reconfigured with new settings).
- Added setting to enable Web Inspector (web developer tools) in Preferences/Browser (same settings key

iOS

[SafeExamBrowser 2.1.16 for iOS in the App Store](#)

Current version of SafeExamBrowser for iOS 9.3.5 and newer

SEB for iOS opens a web browser without an address and search bar, loads a pre-configured webpage and locks an iPad (or iPhone or iPod Touch) into a single app kiosk mode.

New in SEB 2.1.16 for iOS:

- Improved accessibility when using VoiceOver.
- Now supporting hardware keyboard shortcuts (Ctrl-Tab/Shift-Ctrl-Tab) to switch browser tabs.
- Added keyboard shortcut Cmd-M to toggle left side menu (show/hide).
- Improved reconfiguration with MDM Managed App Configuration, to facilitate deployment of SEB settings.
- Added new option to lock SEB when it's attempted to capture the screen.
- Added new option to lock SEB when closing an iPad case on iOS <13. as the displayed iOS lock screen could contain a cheat sheet.
- Implemented separate settings to control clearing cookies when starting/ending session. This allows users to stay logged-in, for example when starting an exam with individual settings in some learning management and exam systems.
- Fixed issues when calculating the Config Key hash with specific settings. Compatible assessment systems can use this

Dopo l'installazione del SEB sul proprio PC è necessario ritornare sulla pagina del corso è cliccare "Scarica configurazione"

Non è stato possibile convalidare la chiave di configurazione o la chiave del browser. Accertarsi di utilizzare Safe Exam Browser con l'appropriato file di configurazione.
